

INSTALLATION

LIFESTYLEBOARD

LIFE STYLE BOARD

MOUNTING INSTRUCTIONS

LIFESTYLEBOARD is the ideal processing finished panel for quick and easy wall covering in your desired design.

It is processed with traditional woodworking machines such as circular and jig saws. LIFESTYLEBOARD is simply hung on to folding strips on the walls to be covered for hidden installation.

Large panel sizes can be fitted together better with two people.

1. CHECK

Verify the structural prerequisites. The substrate must be sufficiently stable and dry.

2. REBATED MOULDINGS ON THE PANEL

Screwing on the rear rebated mouldings at a distance of max. 800 mm. Material such as particle board, 70 x 13 mm.

3. REBATED MOULDINGS ON THE WALL

Horizontal and flat screwing on of the wall-side rebated mouldings using a spirit level and straight edge. Starting from the bottom. Push extra allowances underneath for levelling, if necessary. Material, e.g. plywood, 70 x 16 mm

4. INSTALLATION TIP

Spacer wood pieces in the length of the gap size of the rebated mouldings on the LIFESTYLEBOARD rear side simplify positioning.

5. SHADOW GAP

To hang the LIFESTYLEBOARD, a shadow gap of at least 20 mm to the ceiling is to be provided. These can also be done by surrounding with a trim frame.

6. CUTTING TO SIZE

The cut-out for straight cuts is best done by means of a guide bar and a circular hand saw. Cut-outs can be pre-drilled holes in the corners and then cut out with the jigsaw.

7. HANGING

Hanging alignment of LIFESTYLEBOARD.

8. FEMALE MULTI-POINT CONNECTOR

For perfect installation, the joints are glued in groove and tongue. Material, e.g. HF 3 x 20 mm, silicone gluing

9. DRILLING

Holes for connections can be made to the appropriate diameter using a keyhole saw.

10. PUTTING TOGETHER

One by one, the boards are placed together. Cut the last panel and complete with edge or angle profile.

CARE AND CLEANING

LIFESTYLEBOARD is abrasion-proof, scratch-resistant, chemical-resistant, colour-stable and suitable for use with foodstuffs.

To protect these surface properties it is permitted to use only water with alkaline detergent (e. g. washing-up liquid) for the cleaning. After that we recommend to wipe off the surface with clear water. Therefore please use only clean and soft cloths or sponges.

It is not allowed to use abrasive cleaning agents (e. g. scouring milk) as well as alcohols and solvents.

ANTIBACTERIAL

On request, the high hygiene standard of our easy care, washable products feature an antibacterial surface finish can be further increased. An appraisal in accordance with ISO 22196 verifies the very high antibacterial activity of our product and opens up new application opportunities for spas, clinics, baths, etc.
